

Data transfer cable

LinkIT gender changer DB9 F-F Slim version

Product number: G-9FF

Product Description

Gender Changer for RS232 cables in slim version. A gender changer is a type of cable adapter that converts a male connector to a female connector of the same type or a female connector to a male connector of the same type. Using this cable adapter, you can easily and quickly change the gender, or connect two cables together. By changing the gender of your port and using the cable you already have, it means you do not have to buy a new cable.
