

HDMI Fiber Extender

Stoltzen MPO-HDMI 2.1 Kit Armert 20 m

Product number: MPO-20m-kit-v2.1-A

Product Description

This is the solution you are looking for when it comes to HDMI signal routing in walls, floors, or other spaces with limited room. The signal travels over a fiber cable with MPO connectors, allowing you to route it to even the most challenging locations.

Included in the kit are 2x MPO Female/Female couplers for connecting between the fiber and drop cable. From MPO to HDMI, a cable is provided for both ends, each measuring 1 meter, along with a USB connection for 5V power at the receiver end. This can be connected, for example, to a USB port on a display or a mobile charger provided as an accessory.

The cable in this solution is reinforced and can withstand more than traditional fiber cables.

This solution can be used with already installed MPO cables. However, the MPO cable in this package is designed for use with HDMI and is not fully specified for later modification to data use.

The included cable supports a speed of 72Gbps/s.

Main Specifications

Brand	Stoltzen
Color	Black

Length (m)	20
Connector type 1	HDMI/MPO
Connector type 2	HDMI/MPO
Product series	MPO
Bandwidth	48Gbps
