Stoltzen Typhoon C1 Controller

Rotary Controller for Typhoon Series DSP

Product number: TYP-C1

Product Description

Stoltzen Typhoon C1 - the ultimate control panel for your audio needs!

Partnered with one or more Typhoon X or XD Series DSPs from Stoltzen, Typhoon C1 offers a range of audio control abilities such as volume, mixing, and scene switching. With PoE power supply and UDP communication protocol, this control panel is easy to install and configure for your specific application needs.

Typhoon C1 allows for user customization and programming of up to 32 control functions. Its intuitive interface and FLOW software make it simple to connect multiple physical panels to the DSP device via network.

In addition to its own processing functions, Typhoon C1 can also be used to control third-party audio, lighting, and electrical equipment, making it a versatile and simple central control solution.

Upgrade your audio control experience with Stoltzen Typhoon C1 today.

Main Specifications

Brand	Stoltzen
Color	White
Measurements (WxHxD)	86x86

Power Supply	PoE
Ports	UDP TCP/IP
Program Port	TCP/IP (RJ-45)
Output Port	TCP/IP (RJ-45)

Extended Specifications

Operating Humidity	10% to 90% RH (non-condensing)
Operating Temperature	+32 to +104 °F (0 to +40 °C)
EAN	7072262009872
Net Weight	0.36kg
